CC DRIVER

Model: 160NS-E*300BHC

Power: 160W

Rev.: V01

Release date: 2026-07-30

160NS-E*300BHC Series LED Driver

Features:

- Efficiency up to 95%
- Non-isolated power supply design
- Dual-live-wire input off without afterglow
- Isolated dimming: 0-10V,PWM,Resistor
- AUX Power: 12V/0.2A
- Dim-to-Off
- Surge protection: CM: 6kV, DM: 6kV
- Type HL, Suitable for hazardous locations
- Protections: SCP/OTP/UVF
- Programmable
- Warranty: 5 years

RoHS

Description

160NS-E Series are 160W non-isolated constant current LED Driver with 249-528Vac. It has DIM to Off, high efficiency, isolated auxiliary power supply, compact housing ,fullypotted , high reliability, high cost performance and other advantages.

Applications:

Plant lighting, Wall washers, Linear industrial lamp, Flood lighting, Wall lam.

Model List:

Model	AC Input Range	Max. Pout	Vout Range	Full Power Vo Range	Iout	THD(Typ.)	PF(Typ.)	Eff.(Typ.)	Max.Tc
160NS-E*300 BHC	249-528Vac	160W	180-300V	200-300V	0.1-0.8A	8%	0.97	95%	90°C

Note:

1.Default Tested: at 347Vac, full load, Ta 25°C.

2.The performance of the LED Driver can be guaranteed within the full power Vo range.The voltage lower than full power Vo range,it is need to test the performance with the LED module.

Software TOP function

The software OTP is an optional feature, and the OTP parameters can be set through the software page.

Timer Dimming

Automatic conversion between DST and Standard Time. Traditional Timer Dimming, Self-Adapt-Midnight Timer, Self-Adapt-Percentage Timer. The time dimming percentage can be set by setting 8 curves.

Traditional timer: After power-on, it works according to the set timing curve (Increasing fade time allows for slow changes between different dimming levels, preventing sudden changes in brightness and causing dazzle)

Self Adapting-Midnight: Automatically save power-on times and use 2 valid timers to assume that the center point of the dimming curve is local midnight time.

Self Adapting-Percentage: Runs the initially set dimming curve according to an automatically calculated adaptive cycle time.

CLO Constant Lumen Output

Light failure compensation function, in the Luminaire life cycle, by gradually increasing the output current, to achieve a constant output of LED luminous flux, the overall luminous effect remains unchanged.

ELA End-of-Life Alert

By presetting a LED driver life time, such as 50KH, after the luminaire has accumulated 50KH of light-up time, every time the luminaire is powered on, it will blink 5 times to remind the user to replace the LED driver.

SSA software startup

By setting the soft start time, the lamp gradually lights up slowly within the set time, thus achieving the purpose of protecting the lamp.

Programming connection diagram

1. During programming, the driver does not need to be powered on to achieve all programming functions.
2. For a driver that is powered on and in use, all programming functions can be performed without needing to disconnect the power.
3. It can operate independently of a PC to achieve offline programming.

Parameter			Remark
Default setting	Positive logic dimming (0-10V)	Dimming voltage default 10V (source current)	Factory Default Model
Dimming optional function	Positive logic dimming (0-10V) Turn off the Constant current source	Dimming voltage default 0V (sink current) Resistance dimming not available	When the dimming wire is not connected, the LED driver output is in the DIMOFF state

Note:

Select "Dimming voltage defaults to 10V (source current)" / "Dimming voltage defaults to 0V (sink current)", which needs to be set according to the dimmer used by the end user.

Assembly Tips

1. Dimming or AUX Power tinned connectors should be capped if not used to avoid dimming or AUX Power parts damage from external signals.
2. The trace routing on aluminum substrates is designed in compliance with creepage distance requirements specified by relevant certification regulations.
3. The creepage distance between LED+ and LED- on the aluminum substrate is designed in compliance with the relevant certification regulations.
4. Minimize the copper area on the aluminum PCB to reduce parasitic capacitance and leakage current.
5. It is recommended to design LED beads in parallel first and then in series.
6. The insulation level of LED light panels should meet the reliability design requirements.
7. For other precautions, please refer to the "LED Driver User Manual".
8. SOSEN reserves the right of final interpretation of the above parameters.

Warning

Insufficient or compromised insulation voltage resistance in LED light panels may cause breakdown and short circuits to earth, resulting in damage to the luminaire and LED driver, and posing significant safety hazards. It is recommended to install a residual current device (RCD) during application.

Package

- Outside carton dimension: L×W×H =495mm×385mm×162mm;
- 16PCS/Carton;(160NS-EL300BHC)
- 14PCS/Carton;(160NS-EW300BHC)
- Net weight/Piece: 0.535kg;Gross weight/Carton: 10.0kg;(160NS-EL300BHC)
- Net weight/Piece: 0.650kg;Gross weight/Carton: 11.5kg;(160NS-EW300BHC)
- Please refer to the product name, model number, manufacturer identification, QC PASS, manufacturing date on the package.

Transportation

Packaging is designed suitable for transportation by trucks, vessels and flights. The products should be avoided direct sunlight and rain, loaded/unloaded with caution.

Storage

The product storage meets the standard of the GB 3873-83.
Products should be rechecked if stored for over 1 year before assembly.

RoHS

Products comply with RoHS Directive (2011/65/EU) and amendment 2015/863/EU.
